If you have any questions about the referral process or whether a project should be referred, please call the County Planning Office at 785-3144.

What is a “Full Statement”?

According to NYS General Municipal Law Section 239-m, a “full statement” of the proposed action includes all materials required by and submitted to the local board as an application. This includes the completed environmental assessment form as well as all other materials required to make a determination of significance pursuant to the State Environmental Quality Review Act. When the proposed action is the adoption or amendment of a zoning ordinance or law, the “full statement of such proposed action” also includes the complete text of the proposed ordinance or local law as well as all existing provisions to be affected thereby, if any.

The local board has an obligation to the residents of their community to conduct a thorough and informed review of projects before them. In order to do this, the local board should, at a minimum, only accept project plans that are drawn to scale and show the complete site with all existing and proposed structures. The CPB can not assess potential county-wide or inter-municipal impacts of a referral unless the plans are an accurate depiction of the project site.
